Dangerous cargoes

1. Read and translate the text.

Transportation and handling of dangerous cargoes

Dangerous goods, also called hazardous materials or HazMat, are solids, liquids, or gases that can harm people, other living organisms, property, or the environment. They are often subject to chemical regulations. "HazMat teams" are personnel specially trained to handle dangerous goods. Dangerous goods include materials that are radioactive, flammable, explosive, corrosive, oxidizing, asphyxiating, biohazardous, toxic, pathogenic, or allergenic. Also included are physical conditions such as compressed gases and liquids or hot materials, including all goods containing such materials or chemicals, or may have other characteristics that render them hazardous in specific circumstances. Dangerous goods are often indicated by diamond-shaped signage. The colours of each diamond in a way has reference to its hazard i.e.: Flammable = red because fire and heat are generally of red colour, Explosive = orange, because mixing red (flammable) with yellow (oxidising agent) creates orange. Non Flammable Non Toxic Gas = green, due to all compressed air vessels being this colour in France after World War II. France is where the diamond system of HazMat identification originated. Mitigating the risks associated with hazardous materials may require the application of safety precautions during their transport, use, storage and disposal. Most countries regulate hazardous materials by law, and they are subject to several international treaties as well. Even so, different countries may use different class diamonds for the same product. For example, in Australia, Anhydrous Ammonia UN 1005 is classified as 2.3 (Toxic Gas) with sub risk 8 (Corrosive), where as in the U.S. it is only classified as 2.2 (Non Flammable Gas). People who handle dangerous goods will often wear protective equipment, and metropolitan fire departments often have a response team specifically trained to deal with accidents and spills. Those who may come into contact with dangerous

goods as part of their work are also subject to monitoring or health surveillance to ensure that their exposure does not exceed occupational exposure limits. Laws and regulations on the use and handling of hazardous materials may differ depending on the activity and status of the material. For example, one set of requirements may apply to their use in the workplace while a different set of requirements may apply to spill response, sale for consumer use, or transportation. The most widely applied regulatory scheme is that for the transportation of dangerous goods. The United Nations Economic and Social Council issues the UN Recommendations on the Transport of Dangerous Goods, which form the basis for most regional and national regulatory schemes. For instance, the International Civil Aviation Organization has developed regulations for air transport of hazardous materials that are based upon the UN Model but modified to accommodate unique aspects of air transport. The Globally Harmonized System of Classification and Labeling of Chemicals (GHS) is an internationally agreed upon system set to replace the various different classification and labeling standards used in different countries. GHS will use consistent criteria for classification and labeling on a global level. Dangerous goods are divided into classes on the basis of the specific chemical characteristics producing the risk.

2. Are these statements true or false? Correct the false ones.

1. Dangerous goods can be solid, liquid or gaseous.	4. Dangerous goods require the application of safety precautions during their transportation.
2. Dangerous goods include materials that are radioactive, flammable and explosive.	5. People who handle dangerous goods are to put on protective equipment.
3. Dangerous goods are often indicated by square-shaped signage.	6. All the countries use the same class diamonds for the same product.

3. Study the classes of dangerous goods matching up applications with their descriptions.

Вариант 2.

Marking and labeling of cargoes

1. Read and translate the text.

Cargo labeling requirements

Cargo marking means the proper marking of each package. Each package must have a shipping and transport marking, and a package with cargo requiring special conditions of carriage must be specially marked.

The transport marking must contain information about the point of departure, point of destination, the number of packages in the consignment, the serial number of the package, the weight of the package, the number of the waybill.

The consignor has to indicate reliable and sufficient information about the address and surname, first name, patronymic or name of the consignor and consignee, the weight of the package, the number of packages of cargo, the serial number of the package in the shipping marking, as well as information about the nature of the cargo requiring special conditions of carriage in special marking.

The shipping marking must contain signs indicating how to handle the goods.

Marking is carried out in accordance with the rules and instructions and contains the following information: destination and departure points; exact addresses of the recipient and sender; gross mass of each place; other additional or necessary information. When transporting labels can be used than they are glued to each package next to the consignee's name and address where the place allows.

If a fuzzy transport marking is found on the cargo, the absence of a transport marking on the cargo, the carrier has the right to refuse to transport this cargo.

Goods must be marked and labeled in accordance with IATA resolutions and special rules and standards of the carrier for a particular type of cargo. All signs and markings must be legible and long-term (previous and invalid stickers and markings must be removed).

2. Are these statements true or false? Correct the false ones.

1. Each package must have a shipping marking.	4. The consignor is just the same as the shipper of a cargo.
2. The transport marking must contain signs indicating how to handle the goods.	5. The consignee is just the same as the receiver of a cargo.
3. The shipping marking must contain the points of departure and destination.	6. All signs and markings must be edible and long-term.

3. Look at the picture and study Shipping mark guidelines.

There are a few key shipping marks related rules that shipping companies need to follow and these include:

The port and identification marks that indicate destination and transfer points should be applied by stencil with waterproof ink in a large clear font on three sides of the package.

Coded marks rather than trade names should be present in the shipping mark in order to help ensure that the handlers are less aware of the contents and therefore that the goods are less subject to theft. The codes should be changed from time to time to minimize any familiarity handlers may develop with the codes.

If the shipment requires any sort of specialist handling or treatment then the shipping marks should indicate it; this information should also be present on the bill of lading.

All cautionary and handling shipping marks must be permanent and very legible. Ensure that the languages at the origin and destination are the same, and if not make sure that shipping marks are in both languages.

It is highly recommended that a stencil is used when creating shipping marks as it increases legibility – try to avoid materials which are not waterproof.

4. Answer the following questions:

How many sides of the package should be applied destination and transfer points on?	Where should the information about required specialists be present, in addition?
Why should coded marks be present in the shipping mark rather than trade names?	What should be all cautionary and handling shipping marks?
Why should the codes be changed from time to time?	Why is it highly recommended to use a stencil when creating shipping marks?

5. Match the cargo marking symbols with their designations.

Railway Museums

1 вариант

The Liverpool and Manchester Railway, the first successful passenger-carrying railway in the world, was begun in 1826. **The Liverpool Museum** has much of interest relating to the Railway, including an early locomotive, the "Lion". In 1837 the Liverpool and Manchester Railway ordered two locomotives to haul luggage trains, which were later called 'Lion' and 'Tiger'. They were the first locomotives built by Todd, Kitson and Laird, who used a conventional 0-4-2 wheel arrangement with inside cylinders.

Another steam train Mallard 4468 London – North-East railway was built in England in 1938 by Nigel Grassley as a locomotive. It was used for driving speed trains. Mallard has world record in speed among steam locomotives 126 ml/h (202 km/h) on the hill Stoke Bank.

2 вариант

The Rainhill Railway Museum, housed in an old railway coach adjacent to the Library in View Road, Rainhill, has displays and documents describing the Trials and the Liverpool and Manchester Railway. This museum is maintained by Rainhill Railway and Heritage Society. The Museum of Science and Industry in Manchester contains the building which formed the original Manchester terminus of the Railway. The museum has opened up its workshop as well as backroom collection. There you can find many models of railroads and a vintage layout used to teach railroad operation.

3 вариант

George Stephenson is considered to be the inventor of the first practical steam locomotive engine for railways. In 1825, Stephenson moved to the Liverpool and Manchester Railway, where together with his son Robert and Henry Rooth built (1826-29) the Rocket. In 1829, the Liverpool & Manchester Railway offered a prize of 550 pounds Sterling to any company or individual who could build a locomotive that would weigh less than six tons and could pull a load of 20 tons at a rate of ten miles per hour. Of the five engines entered in the October 1829

trials, only the Rocket completed the course. For this achievement, the L & M bought the Rocket from Stephenson and soon thereafter ordered four more for their passenger service between Liverpool and Manchester. A copy of the Rocket is now on display at the **National Railway Museum in York**.

Circum-Baikal Railway is the biggest **architectural monument** in Russia nowadays and the most expensive railroad built in royal Russia! This place is considered one of the most attractive places on Baikal! Tunnels and arches on the shore of Baikal are built in delicate style of Italian architectures. This place reminds a small piece of old Europe in far-away Siberia. The Trans-Siberian railway used to be a part of great Circum-Baikal Railway.

This railway concentrates 39 tunnels, 15 galleries, 440 bridges and other constructions on its 84 km length!. About 1 ton of dynamite for each 1 km in average was to be used to clear space for railroad on rocky terrain. It is used mostly for tourist attraction as unique architecture ensemble and as a historical open-air monument.

Looking for love

Looking for Love is an agency that finds partners for single people of any age. Read about Lisa.

My name's Lisa. I'm 25 years old and I'm from Manchester. I'm single and I'm looking for love.

I'm a journalist on a local newspaper, which means I write stories about local issues and sometimes I interview politicians. I like my job, but I'd like to work on a national newspaper one day. That's because I want to have the opportunity to work abroad.

I have a small group of friends who I've known for years. I even went to school with some of them! I'm not really extrovert but I do like going out and having fun. We usually go out to parties, nightclubs, and restaurants. I also like cooking and I make great pasta! My ideal night in is a good meal, a glass of wine, and a DVD. I like thrillers much more than I like romantic comedies!

I'm not very sporty, but I like to keep fit. I stopped smoking last year and now I go running twice a week and I sometimes go to the gym at weekends. I eat lots of fruit and vegetables and I try not to have red meat or too much coffee. At work, I drink water or tea.

I prefer men who are interested in serious issues because I like talking about politics and what's happening in the world. However, I also like men with a good sense of humour. These characteristics are more important to me than physical appearance.

Please contact *Looking for Love* if you think you're the kind of person I'm looking for!

Dear Max,

Well, my family is rather small: my parents and me. My mother Lily works as an engineer at a factory. She's good at drawing. My father Vitaly works as a shop assistant.

I'm not going to choose any of their professions because I'm not good at mathematics. I'm interested in cooking and I'll go to cooking classes. I'd like to have my own restaurant. I sometimes create new things in the kitchen.

What about you?

Best wishes,

Tamara

Listening script for (task 4)

Last September my boyfriend and I went on holiday to Thailand. It was a disaster. The flight arrived in Bangkok nine hours late. There we were at eleven o'clock at night, and we didn't have anywhere to stay and we didn't know how to get into the city centre. So, we stayed at the

airport hotel, which was very comfortable but really expensive.

The next day, we wanted to take a train south to the islands. But we couldn't because we couldn't book any seats. The trains were full. So, in the end, we went by bus and by boat. It was cheaper but it took a lot longer. And when we got to the island we wanted to get to, we couldn't believe it! Where was the sun? It was raining really heavily. And the weather was windy and wet for days. It was awful. We went to restaurants and we went shopping, but we didn't spend any time on the beach. We couldn't sunbathe or go swimming, so we just argued for a week...

We interviewed three people about how family and friends have affected their personalities.

Maria Stanovich

I've always had a strong relationship with my family. An important influence on my personality was my grandmother, Hannah. She was born in 1930 into a poor family with seven children – they had to take very good care of each other in order to survive. Growing up in such difficult conditions had a positive effect on her, teaching her to share everything, be honest, helpful, hard-working, and affectionate. My grandmother taught me all these things, making me realize that family is more important than material possessions.

Katie Dupont

The people around you have the greatest influence on your life – they affect the way you behave and think. As soon as Rob and I met, we connected. When Rob was young, his father died in a motorcycle accident. Being brought up as an only child by a single parent made him independent and ambitious. He left home at 16, and since then has lived in different places and had various jobs. He's taught me that it's important to find time for friends and family and to do what makes you happy. He always has fun, trying new things, keeping his mind and body healthy, and he still works hard to achieve his goals. I greatly admire Rob and I hope that one day I can look at life in the way that he does.

Jed Mitchell

I spent many hours as a child listening to my uncle Wilson's stories. He was the youngest of 11 children whose family lived in a fishing town in Scotland. Life was hard and with so many mouths to feed, the children began working from an early age. At just 14, my uncle began his first job as a fisherman. That was the beginning of his adventures – he travelled and worked in Alaska, South-East Asia, India, and Africa. He educated himself, learnt to be a chef, an engineer, a farmer, and photographer. Uncle Wilson taught me that life is special and that you should take every opportunity that you can to fill it with adventure.

How I got my dream job

Are you still looking for your dream job? Don't give up. Here's how three people achieved their goals.

Mario Mendes, 29 –

I'm doing something I really enjoy. I'm part of a team that develops new technologies. I work with intelligent, interesting people and occasionally get to travel abroad. I won't pretend it was easy getting my dream job, but it was worth the effort. My advice? Decide exactly what your dream job is and what it involves. Learn about the job. Make contact with companies that could offer your chosen career. Make sure they know your strengths. You may just get that dream job.

Andy Collins, 46 –

As a student, I earned \$295 a week in cash working in a beach café. At the time, it was my dream job! Later I became a chef. It was hard work, I was often in a hot kitchen for twelve hours a day, six days a week. But you have to know the meaning of hard work if you want to achieve your goals. I now own five restaurants around the U.S. My best advice is to find out what your skills and talents are. Talent is something you're born with. Skills are something you've learned to do. People like doing things that come naturally to them, so work and enjoy!

Sarah Cooper, 38 –

I'd been working as a secretary for three years when I decided to change my career. My work was often boring and always busy. I started studying to become a teacher. It certainly wasn't easy; I continued working full-time to pay for my training at night school. I was exhausted most of the time, but after two years, I finally got my qualifications and resigned. I'm now a primary school teacher and it's as good as I imagined. So don't wait! Write a list of the things that are stopping you from getting your dream job. Make a plan to deal with each thing. There's always an answer.

Example: Mario is _____.

A very interesting B self-employed C very happy with his job ✓

1 Mario sometimes _____.

2 Mario thinks he got his dream job because _____.

A he's intelligent B it was easy C he did a lot of preparation

4 When he was a chef, Andy _____.

A earned \$295 a week B didn't enjoy his job C didn't get much time off

Dear Max,

Thanks for your letter. My family is quite common. My mum Lilia works as an engineer at a factory. She's calm and never loses her temper. They both leave home early in the morning, do their everyday work which I find boring, and come home to spend time with me)

To tell you the truth, I'm not going to become either a shop assistant or an engineer. You remember I'm good at cooking, so I'm thinking about starting my own restaurant one day. But first I need to take a course in cooking.

Have you decided what to do in the future?

The frozen extremes of the earth

The Arctic in the north and the Antarctic in the south are at opposite ends of the planet, but they are similar in many ways. Both are lands of ice and snow, where the temperature in winter can be so low that your skin can freeze in seconds – it can be as low as -80°C . Very few animals are able to survive these conditions, but there are some both in the north and in the south. The Arctic has more plants and animals than the Antarctic, including polar bears, the largest bear in the world. In the south there are no land animals because of the extreme cold, but there are penguins and other sea animals that live on or near the coast – although both in the north and the south the sea is frozen for much of the year.

One difference between the Arctic and the Antarctic is the human population. In parts of the Arctic there are towns and villages. Greenland, for example, the largest island in the world, has a population of 55,000 people. Many of these people work in fishing. They have a difficult life. There aren't many roads between towns and villages, so people travel by snowmobile or with dogs. From November to January, it's dark for 24 hours a day, but from May to July there are 24 hours of daylight.

In the Antarctic there are no normal towns and villages. Only scientists live there all year round, in special buildings called 'stations'. They study the sea animals and learn about the history of the world's climate by studying the weather and the ice. It's a hard place to live, especially in winter, but many of them love it there and return again and again.

Example: The Antarctic is the coldest place in the world.

A True B False C Doesn't say V

- 1 There aren't any animals in the Antarctic.
- 2 No people live in the Antarctic.
- 3 There aren't any towns in the Antarctic.
- 4 It is usually -80°C in the Antarctic.
- 5 The sea in the Antarctic is usually frozen.
- 6 There aren't any sea animals in the Arctic.
- 7 In Greenland, people don't work in winter.
- 8 There aren't many roads in Greenland.
- 9 In Greenland in October it's light all the time.

Task 4. Read the text once again. Write the Arctic or the Antarctic.

Example: It's at the South Pole. **the Antarctic**

- 1 Scientists sometimes live here in stations.
- 2 No land animals live here.
- 3 People live here all the time.
- 4 There are more plants here.
- 5 In December it's dark for 24 hours a day.
- 6 There aren't any towns or villages here.

You can enjoy the rich flavor and delightful aroma of freshly ground coffee beans without having to spend extra money on a coffee grinder simply by using your blender.

Step 1 - Set Up Your Blender

Put your blender on a flat surface on the counter and plug it in. The flat surface is really important so the blender's vibrations do not cause other things to fall off the counter.

Step 2 - Decide how Finely You Need to Grind the Beans

Different kinds of coffee makers require different beans. Medium ground beans work best for a Drip maker. This means that when you pour the ground coffee into your hand, some will stick together, while most will fall away. Espresso Machines tend to do best with medium-fine grounds. In this case most will stick together, but individual grounds can be easily seen. French Press Makers require a more coarse texture so that the grinds do not stick together at all.

Step 3 - Pour Your Coffee Beans into the Blender And Grind Away

Start with a small amount of beans in the blender until you can figure out exactly how much ground coffee your beans will yield. As you have more experience, you will be better able to determine the right amount of coffee beans to put into your blender, but typically, a handful of beans should yield one to two tablespoons of ground coffee

Вы можете наслаждаться богатым вкусом и восхитительным ароматом свежемолотых кофейных зерен, не тратя лишних денег на кофемолку, просто используя блендер.

Шаг 1 — Настройте свой блендер

Положите блендер на плоскую поверхность на столе и подключите его к сети. Плоская

поверхность очень важна, чтобы вибрации блендера не приводили к падению других предметов со стола.

Шаг 2. Решите, насколько мелко вам нужно измельчить бобы.

Для разных кофеварок требуются разные зерна. Зерна среднего помола лучше всего подходят для кофеварок капельного типа. Это означает, что, когда вы насыпаете молотый кофе себе в руку, некоторые из них слипаются, а большая часть отваливается. Эспрессо-машины, как правило, лучше всего работают с зерном среднего помола. В этом случае большинство из них слипнутся, но отдельные частички легко просматриваются. Кофеварки типа френч-пресс требуют более грубой текстуры, чтобы помол не слипался.

Шаг 3. Насыпьте кофейные зерна в блендер и измельчите

Начните с небольшого количества зерен в блендере, пока не сможете точно определить, сколько молотого кофе получится. По мере того, как у вас будет больше опыта, вы сможете лучше определить, сколько кофейных зерен нужно положить в блендер, но, как правило, горсть зерен должна давать от одной до двух столовых ложек молотого кофе.

Pam So, what do you think about Mark? Do you think we should give him the job?

Bob Mmm. I don't know. If he weren't as young as he is, I'd definitely give him a chance, but I don't think he has enough experience.

Pam Neither do I. Although he'd probably be good at it, we need someone who's older.

2

Bob I thought Gemma was someone who has some experience of the job. And she was very open and got on with everybody.

Pam Well, yes, she had great personal qualities, but she hasn't finished her university course or passed any exams yet. I think we should find somebody who's actually finished university.

3

Pam So, do you think Luke is better than the others?

Bob Well, he's older. He used to work for a major company in Italy, but he left that job five years ago and he hasn't worked since. I don't think he's very good and perhaps he'll get bored quickly. I think we need someone who has more recent experience of this sort of job.

4

Bob David might be the person we're looking for. In this job you have to spend a lot of time managing other people and he's good at that.

Pam Well, yes, I agree, although I don't think David's very good at solving problems and, in this job, that's as important as being able to manage.

5

Pam Shall we give the job to Susie, then? She won't be the most experienced person we've ever employed, but she'll work harder than most, that's for sure.

Bob Mmm. But I think we need someone who is more intelligent than Susie. I don't think she's bright enough.

20. Norwich people still like using the old market as well as shopping in 'The Castle Mall'.

Norwich

Norwich, the capital of the part of Britain known as East Anglia, has existed as a place to live for more than two thousand years. It began as a small village beside the River Wensum. At the time of the Norman invasion in 1066 it had grown to become one of the largest towns in England.

With two cathedrals and a mosque, Norwich has long been a popular centre for various religions. The first cathedral was built in 1095 and has recently celebrated its 900 th anniversary, while Norwich itself had a year of celebration in 1994 to mark the 800 th anniversary of the city receiving a Royal Charter. This allowed it to be called a city and to govern itself independently.

Today, in comparison with places like London or Manchester, Norwich is quite small, with a population of around 150,000, but in the 16 th century Norwich was the second city of England. It continued to grow for the next 300 years and got richer and richer, becoming famous for having as many churches as there are weeks in the year and as many pubs as there are days in the year.

Nowadays, there are far fewer churches and pubs, but in 1964 the University of East Anglia was built in Norwich. With its fast-growing student population and its success as a modern commercial centre (Norwich is the biggest centre for insurance services outside London), the city now has a wide choice of entertainment: theatres, cinemas, nightclubs, busy cafés, excellent restaurants, and a number of arts and leisure centres. There is also a football team, whose colours are green and yellow. The team is known as 'The Canaries', though nobody can be sure why.

Now the city's attractions include another important development, a modern shopping centre called 'The Castle Mall'. The people of Norwich lived with a very large hole in the middle of their city for over two years, as builders dug up the main car park. Lorries moved nearly a million tons of earth so that the roof of the Mall could become a city centre park, with attractive water pools and hundreds of trees. But the local people are really pleased that the old open market remains, right in the heart of the city and next to the new development. Both

areas continue to do good business, proving that Norwich has managed to mix the best of the old and the new.

How To Grind Flaxseed

There are several ways of grinding flaxseeds into powder to get the full health benefit. These include the use of a blender or food processor, a coffee grinder, or manual methods like mortar and pestle.

Each of these ways comes with its uniqueness to grind flax seeds to a powder. This article answers the question by reviewing the best ways to grind flaxseeds.

Can You Grind Flaxseeds in A Blender?

Blenders or food processor is a common kitchen appliance to grind. If you want to grind flaxseeds in a blender or food processor, you will need to add at least a cup of flaxseed into the blender or food processor for it to work properly.

This method takes several minutes as you need to regulate the speed of your blender or food

processor, stop, shake, and blend again until your flaxseed is ground to your desired consistency.

Using a blender or food processor to grind flaxseed is time-consuming as you have to continue regulating the speed, and grind again to achieve your result.

While using a blender or food processor, care needs to be taken to prevent the flax seeds from turning into paste due to the high quantity of oil present in them.

Как измельчить льняное семя

Есть несколько способов измельчения семян льна в порошок, чтобы получить максимальную пользу для здоровья. К ним относятся использование блендера или кухонного комбайна, кофемолки или ручные методы, такие как ступка и пестик.

Каждый из этих способов имеет свои уникальные особенности измельчения семян льна в порошок. Эта статья отвечает на вопрос, рассматривая лучшие способы измельчения семян льна.

Можно ли измельчить семена льна в блендере?

Блендер или кухонный комбайн — это обычный кухонный прибор для измельчения. Если вы хотите измельчить льняное семя в блендере или кухонном комбайне, вам нужно будет добавить в блендер или кухонный комбайн как минимум чашку льняного семени, чтобы он работал правильно.

Этот метод занимает несколько минут, так как вам нужно отрегулировать скорость блендера или кухонного комбайна, остановить, встряхнуть и снова смешать, пока льняное семя не будет измельчено до желаемой консистенции.

Использование блендера или кухонного комбайна для измельчения льняного семени отнимает много времени, так как вам нужно продолжать регулировать скорость и снова измельчать, чтобы добиться желаемого результата.

При использовании блендера или кухонного комбайна необходимо соблюдать осторожность, чтобы семена льна не превратились в пасту из-за большого количества присутствующего в них масла.

Read the letter and do the tasks on the text

Dear Ann,

Thank you for asking to come and visit you and your family next month. It is a great idea.

I'm really interested in visiting new places. I like museums and old churches very much. I also like visiting art galleries - there are so many fascinating things to see there. I know there is one in your town. Can we visit it? You say that there isn't a sport center in your town but is there a swimming pool? I enjoy swimming a lot and I love diving. Is there also a place to eat fish and chips? Fish and chip shops are great!

The only problem is that I don't know what to take with me: warm shoes, a jumper, boots? What's the weather like in your area? In my town it rains a lot and that's why I always carry an umbrella with me. And what about other things? For example, a camera?

Please send me a leaflet about your town and a street map.

One last question - how old is your sister, Gina? I want to bring her a present. Would she like the new Celine Dion CD?

See you soon!

Nicola Peet left school at eighteen, went to college and then worked at a local airport. After nine months, she went to work for Saudi Arabian Airlines and then she joined British Airways as an air hostess. Four years later, she got her present job as a manager.

This is what she told us about her job:

 Sometimes I go on long flights to check how the air hostesses are doing. That's my favourite part

EposCam Alternatives

If you're not satisfied with EposCam, there are a few other apps that allow you to use your iPhone as a webcam.

1. iCam

iCam is a paid app that can turn an iPhone into a webcam. The mobile app is just one part of the equation; like EposCam, you'll also need the iCamSource component on your computer. Once you have both apps installed, you can stream live video and audio from any iOS device.

iCam also works as a security camera; it can send you instant alerts if it detects motion or sound. All motion events are automatically backed up to the cloud. In addition to the original iCam, the company also offers iCam Pro with some additional features.

2. iVCam

iVCam is specifically designed for iPhone owners who have a Windows PC---you cannot use iVCam to stream your iPhone's video output to a Mac.

The app works via WLAN or USB and allows you to connect multiple phones to one computer at the same time. You can stream video in 1080p, 720p, 480p, or 360p resolution. This multi-connection aspect means the software is ideal for anyone who wants to use their old iPhone as a CCTV device, a baby monitor, or a pet cam.

1. айкам (iCam)

iCam — это платное приложение, которое может превратить iPhone в веб-камеру. Мобильное приложение — это только одна часть уравнения; как и в случае с ЕросСам, вам также понадобится компонент iCamSource на вашем компьютере. После установки обоих приложений вы можете транслировать живое видео и аудио с любого устройства iOS.

iCam также работает как камера безопасности; оно может отправлять вам мгновенные оповещения, если обнаруживает движение или звук. Все движения автоматически сохраняются в облаке. Помимо оригинального iCam, компания также предлагает iCam Pro с некоторыми дополнительными функциями.

2. айвикам (iVCam)

iVCam специально разработан для владельцев iPhone, у которых есть ПК с Windows —

вы не можете использовать iVCam для потоковой передачи видео с вашего iPhone на Mac.

Приложение работает через WLAN или USB и позволяет одновременно подключать несколько телефонов к одному компьютеру. Вы можете транслировать видео в разрешении 1080p, 720p, 480p или 360p. Этот аспект множественного подключения означает, что программное обеспечение идеально подходит для всех, кто хочет использовать свой старый iPhone в качестве устройства видеонаблюдения, радионяни или камеры для домашних животных.

THE ICEHOTEL

For many years the Arctic was a popular destination in the summer season to see the land of the midnight sun but in winter the few inhabitants had the snow and ice to themselves. By the end of the 1980s it was decided that the dark and cold winter should be seen as an advantage. In the winter of 1990, the French artist Jannot Derit was invited to have the opening of an exhibition in a specially built igloo (a building made of snow) in the little town of Jukkasjärvi on the frozen Torne River. The building, named Arctic Hall, attracted many interested visitors to the area. One night a group of foreign guests decided it would be a good idea to sleep in the Arctic Hall. The

following morning the brave group were very pleased with their experience and the idea of an ice hotel was born. Today it is world famous.

As soon as winter begins, a team of snow builders, architects and artists from all over the world come to Jukkasjärvi and they make the hotel for that year. As one part is completed, it opens to visitors and overnight guests, while the other parts are still being built. The first part is completed in December and each week after that a new part opens, until January 7th when the hotel is completed. As the ICEHOTEL is built under the open sky, using the natural materials of

the winter season, the finishing date depends on nature and therefore there are sometimes changes to the plan. In the spring, as the weather gets warmer, the hotel melts.

Inside the hotel, the temperature is never colder than $-5\text{ }^{\circ}\text{C}$ to $-8\text{ }^{\circ}\text{C}$, however cold it may be outside. Winter outer clothes such as warm overalls, hats and gloves are included in the cost of guests' stay at the hotel. In addition to this, it is a good idea for guests to bring sweaters and a scarf as well as plenty of woolen socks and to choose footwear that is larger than normal to allow space for thick socks.

If you are planning to come to the hotel, you can buy warm sweaters, woolen socks and much more on the ICEHOTEL website. You can order these and the equipment you will need at the same time as you book your visit. The items will be delivered to your room when you check in. The hotel is in the village of Jukkasjarvi, 200 km above the Arctic Circle but only 15 km from Kiruna airport and 17 km from Kiruna train station. Transport by bus can be arranged from the airport or train station to the IceHotel.
